Feel great, shoot great. Introducing the newest option on the most ergonomic striker fired handgun available. The new push-button style mag release option from HK means the VP doesn't just fit your hand, it fits your shooting style as well.

In any firearm, especially a handgun, the many "touchpoints" between the shooter and the firearm are critical to consistent, repeatable, performance. Now, no matter how you are built or how you shoot, the VP series just fits.

- Depending on your shooting style, you can choose between a European-style ambidextrous paddle mag release or the new US-style reversible button.
- The most ergonomic, adaptable grip frame available allows you to interchange both backstraps and grip panels in 27 unique configurations to fit *your* hand.
- The VP trigger is a real upgrade over the industry standard of many years. It has a short, light take-up with a solid, clean break; followed by a short, positive reset.
